

You can rest assured
with our ISO 9001:2015
AS9100D Certified
processes that we get it
right every time.

INDUSTRIES THAT WE SERVE:

- Aerospace & Defense
- Appliance & White Goods
- Automotive/EV
- Battery Power & Distribution
- Industrial Equipment & Automation
- Marine & Pleasure Boat
- Medical Equipment
- Military Armored Vehicles
- Off-Road & Agriculture Equipment
- Rail & Transit
- Recreational & Commercial Vehicles
- Telecommunications

Grounded by our past, wired for the future.

At Allied, we specialize in the manufacture and distribution of electrical wire, cable, tubing and accessories. With our extensive inventory, we can provide you with both stock and hard-to-find products, and customize them with our many value-added services to meet your specifications.

We pledge to using the highest quality materials available in all of our products. As an industry leader, we recognize our responsibility to protect our communities. To do this, we participate in several programs formed to facilitate the protection of our environment.

Our network of distribution locations stock a broad line of wire and cable products including UL Hook-up wire, Mil-Spec wire, Portable Power Cord, Tray Cable, Hi-Temperature wire, Marine wire and Boat Cable, and more. We stock our products in a wide range of colors and gauges so there is a good chance we have what you need in stock. If we don't have it in stock, we'll find it for you.

VALUE-ADDED SERVICES

Our value-added services help make your job easier by making cables easier to identify, faster to install, and tailored to your specific needs. You'll save time and money by letting us do some of the work for you.

CUT & STRIP

Instead of manually cutting each piece of wire from the reel, then removing the insulation from the ends, save time and money by letting us take care of it for you.

INK JET PRINTING

Ink jet printing marks the cable using dots of ink. This makes identification and custom branding easy. Save time in the installation process with proper labeling.

DYEING

A variety of wires can be dyed to help facilitate proper identification of existing or custom installations. We can color match and dye to meet individual specifications.

BRAIDING

Braiding helps add protection to avoid abrasion in harsh environments. Save time by having us braid your wire, cable, or twisted wire.

TWISTING

Twisting wires cuts installation time dramatically by allowing wires to lay together well and making them easier to work with. Letting us handle it saves even more time.

DRUM PACKING

Make your wire easy to store and unroll when needed by having us drum package it. Thousands of feet of wire (depending on gauge) can be stored on a single drum.

EXTRUDING

Help protect and insulate wire in abrasive environment with extruding. Your wire will last longer, and you'll save time and money on future replacements.

TAPING

Add a tape jacket to your cable to group individual wires together creating a multi-conductor cable. This process adds a little extra protection from wear.

STRIPING

Wire striping makes cable identification simple. Your application will stay organized, saving you time locating wires during installation and maintenance.

YOUR DEDICATED WIRE & CABLE SPECIALIST

At Allied, we take pride in offering our customers the best experience possible. While we have always specialized in our quick response times to custom orders and hard-to-find parts, we also exceed our customer's expectations for large volume stock products with our tailored inventory solutions. We are an authorized distributor for the industry's leading manufacturers, so we can provide you with the brands that meet your requirements. Large or small, stock or custom, for all of our brands we want to be your partner of choice for all of your wire and cable needs.

We are dedicated to providing the highest quality products and services to our customers, the lifeline of our company. Our UL/CSA and Mil-Spec wires offer a variety of insulations including EPDM, ETFE, FEP, Fiberglass, Kynar, Nylon, PVC, PTFE, Silicone, XLPE, XLPVC, and XLETFE.

Because of our commitment to our customers, each and every Allied Wire and Cable employee recognizes and fulfills the responsibility of implementing superior service with every customer. Ultimately, we measure the success of our company by our customer satisfaction. Learn more about the Allied Wire and Cable experience at awcwire.com.
