Cobra Wire & Cable is a world leader in developing and producing high quality wire and cable meeting virtually every electrical application.

ElectroWire is the largest stocking distributor of Exane[®], the transit cable of choice used in over 20,000 locomotives and light rail transit cars worldwide.

Allied Wire & Cable is a specialty manufacturer and distributor of electrical wire, cable, tubing and accessories. Our products, services, and experience help many industries.

Seacoast is a specialty supplier of cable and associated electrical and electronic products for the military and shipbuilding industry, the oil and gas industry, and industrial markets.

GCG Connectivity & Power Solutions provides innovative products and solutions for customers in a wide range of markets.

Aerospace

Appliance & White Goods

Automotive/EV

Data Centers

Industrial Equipment & Automation

Industrial Steel & Infrastructure

Marine, Pleasure Boat & Shipbuilding

Medical Equipment

Military & Defense Armored Vehicle

Oil & Gas

Rail & Transit

Recreational & Commercial Vehicles

Solar Charging

UPS Systems, Battery Power & Distribution

What You Need, **Where You Need It!**

GCG is positioned across the country to better serve your needs.

Shop **On-Line**

AWCwire.com

With our extensive inventory, we can provide you with basic and hard-to-find wire, cable, and tubing to meet your specific needs.

seacoastUSA.com

One of the most extensive & complete inventories of military, shipboard, marine, oil & gas and industrial cables.

shop.goGCG.com

Your personalized portal - shopping, check order status, pay invoices, and more!

VALUE-ADDED SERVICES

Our value-added services help make your job easier by making cables easier to identify, faster to install, and tailored to your specific needs. You'll save time and money while avoiding the headaches that come with using stock cables.

CUT & STRIP

Instead of manually cutting each piece of wire from the reel, then removing the insulation from the ends, save time and money by letting us take care of it for you.

INK JET PRINTING

Ink jet printing marks the cable using dots of ink. This makes identification and custom branding easy. Save time in the installation process with proper labeling.

DYEING

A variety of wires can be dyed to help facilitate proper identification of existing or custom installations. We can color match and dye to meet individual specifications.

BRAIDING

Braiding helps add protection to avoid abrasion in harsh environments. Save time by having us braid your wire, cable, or twisted wire.

TWISTING

Twisting wires cuts installation time dramatically by allowing wires to lay together well and making them easier to work with. Letting us handle it saves even more time.

DRUM PACKING

Make your wire easy to store and unroll when needed by having us drum package it. Thousands of feet of wire (depending on gauge) can be stored on a single drum.

EXTRUDING

Help protect and insulate wire in abrasive environment with extruding. Your wire will last longer, and you'll save time and money on future replacements.

TAPING

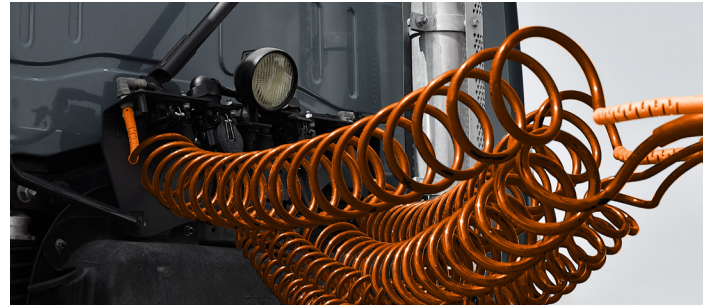

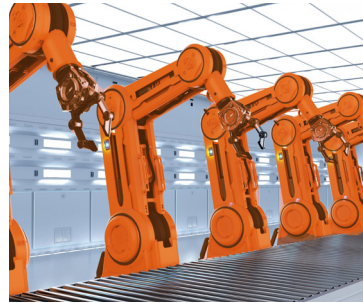

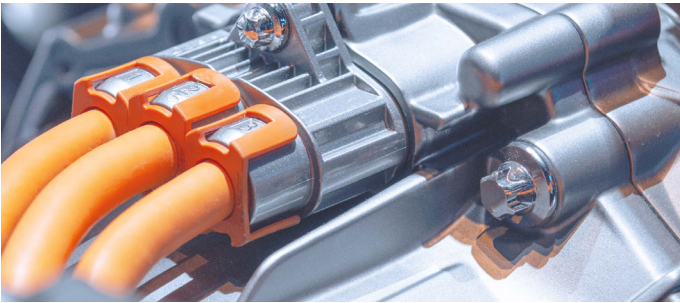

Allied can add a tape jacket to your cable in order to group individual wires together creating a multi-conductor cable, as well as adding a little extra protection from wear. The end result is similar to extruding, but it is designed to perform better.

STRIPING

Wire striping makes cable identification simple. Your application will stay organized, saving you time locating wires during installation and maintenance.
